

# Extruded Polystyrene Insulation **FOAMULAR**<sup>®</sup>

“Owens Corning’s Foamular insulation is an extruded polystyrene rigid foam insulation with stable, high insulating values and superior moisture resistance when compared to other types of foam insulation.”

Owens Corning has been producing insulation since 1935 and has been a leading force in the way the insulation industry has developed. Owens Corning is a member of EPA Climate leaders program, and is committed to reducing Greenhouse gas Emissions in the manufacturing process and through product performance.

**“Insulation Is One Of The Most Effective Ways To Improve A Buildings Energy Efficiency.”**

Austech has been nationally distributing building products for 25 years, and distributes Foamular Australia wide. Austech’s sales and technical team can recommend the best product for your application and help with the specification process.

## ***New South Wales***

# Extruded Polystyrene Insulation **FOAMULAR**<sup>®</sup>

## Application: Insulation in Green Garden Roof Assemblies.

Foamular Extruded Polystyrene is the ideal insulation for a green garden roof assembly. It provided no nutritional value to plants or animals and has guaranteed long term thermal

**“Green Roof Gardens Are Carbon Sequestrators, Absorbing Carbon From The Air & Improving Air Quality”**

Prolonged contact with the growing medium is not an issue since Foamular is not damaged by contact with soil, moisture, bacteria and other organic compounds.

Foamular’s high moisture resistance and superior strengths makes it ideal for protecting the roofing membrane, increasing the roof’s life-cycle, plus reducing maintenance costs and energy demands.

**Recommended Material: FM 250/350, 75mm [R2.67]**
