

Extruded Polystyrene Insulation **FOAMULAR**[®]

“Owens Corning’s Foamular insulation is an extruded polystyrene rigid foam insulation with stable, high insulating values and superior moisture resistance when compared to other types of foam insulation.”

Owens Corning has been producing insulation since 1935 and has been a leading force in the way the insulation industry has developed. Owens Corning is a member of EPA Climate leaders program, and is committed to reducing Greenhouse gas Emissions in the manufacturing process and through product performance.

“Insulation Is One Of The Most Effective Ways To Improve A Buildings Energy Efficiency.”

Austech has been nationally distributing building products for 25 years, and distributes Foamular Australia wide. Austech’s sales and technical team can recommend the best product for your application and help with the specification process.

New South Wales

Austech External Building Products
80 Tattersall Road, Blacktown NSW 2148
PO Box 4208 Marayong NSW 2148
Phone: 02 9831 1623

Extruded Polystyrene Insulation **FOAMULAR**[®]

Application: Precast/Masonry Wall Internal Insulation.

Masonry and concrete have revolutionised the way we build, but they have the big drawback of having very bad insulation properties. Foamular Extruded polystyrene is a closed cell insulation board ideal for increasing the r-value of internal walls.

Just 50mm of Foamular had an R value of R1.78. In comparison, 110mm of brickwork is R0.18 and 100mm concrete slab is R0.069. Foamular is therefore the ideal solution to improve the performance of these walls.

“Any Carbon Released During Production of Foamular Is Easily Re-Couped Through Increased Energy Efficiency”

Foamular Extruded Polystyrene boards meet BCA Part J requirements with added benefits. Foamular is lightweight but tough, which makes it easier and safer to use on site.

Foamular is suitable for various fixing mechanisms. Depending on the project, Foamular can be fitted using adhesives, mechanical fixings eg Hilti XIE) or furring Channel.

Recommended Material: FM 250, 50-75mm (To meet desired R-values)
